

INTEFLEX™

STACKING MODULAR WALL PANEL SYSTEM

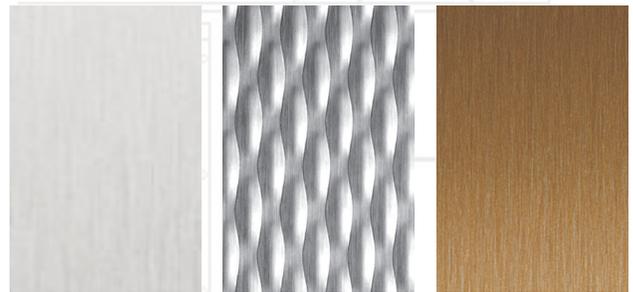

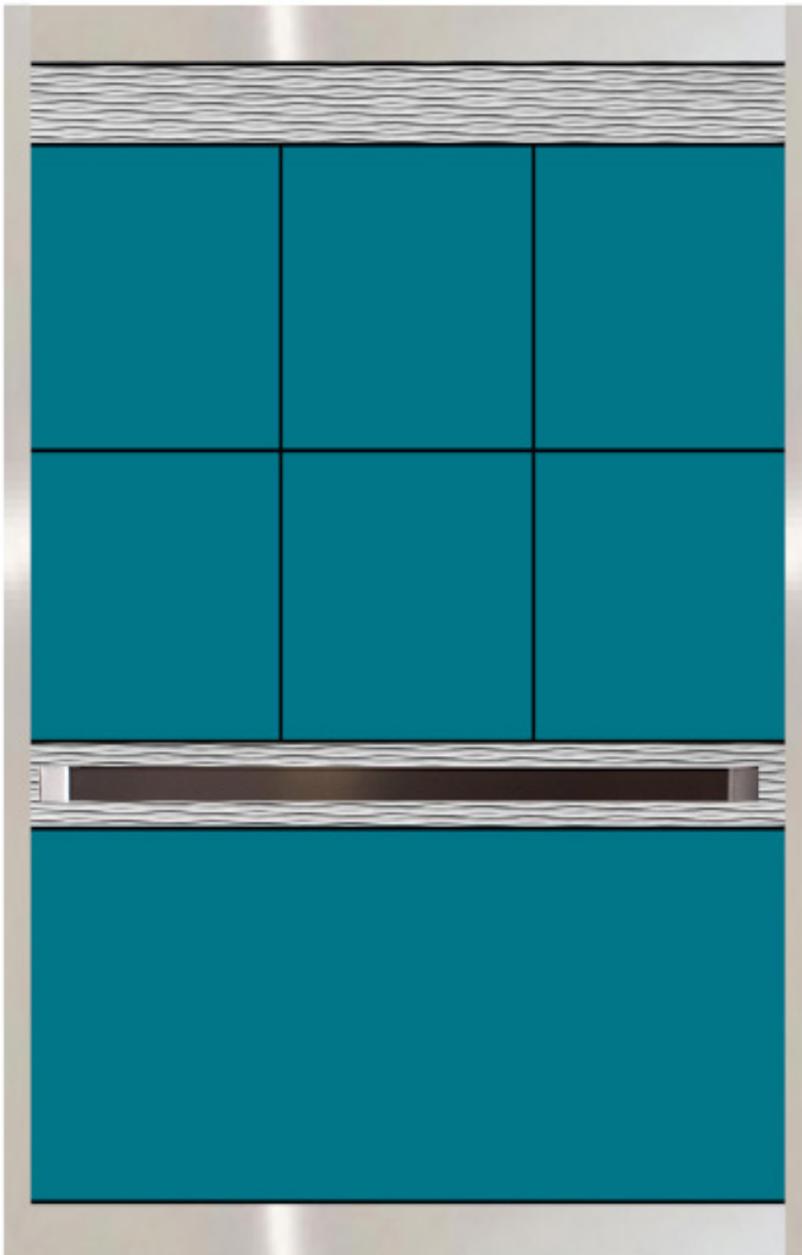

BISTRO™

The Bistro™ design is very adaptable to your building's interior. A modern and sleek design can be achieved by the use of solid color laminates and stainless steel accents. A classy warm feel can be achieved with blurred patterned laminates and brass accents.

A large dominate lower horizontal panel is featured with an upper panel proportionally divided with powder-coated panel reveals. The panels are separated by a narrow horizontal panel behind the handrail. The recessed cap reveal, wall base and corner reveals frame the BISTRO™ design.

Additional BISTRO™ panel designs and material selections can be seen on our website.
